

Ribcraft 850 Sports Cruiser

Offshore performance with comfort

Concept

Whether its family days out water-skiing or long distance offshore cruising, the Ribcraft 850 Sports cruiser is designed to exceed your requirements. It bridges the gap between a family fun boat and a serious offshore craft.

Cuddy / Cabin

The cuddy cabin design opens up a whole new level of comfort and protection for a Rigid Inflatable Boat. The wrap around screen offers a good deal of protection for the occupants, keeping you away from wind-chill and spray.

Cabin Interior

Inside the two berth cabin there's enough room for an overnight stop for two. The centre bed cushions are removable allowing you to sit inside the cabin. The Interior of the cabin is custom built to your requirements with optional extra's such as a small toilet.

Why is it different from other Sport Ribs

The Ribcraft 850 Sport is very strong and well constructed, she's made to handle inhospitable conditions. Everything has been designed with this concept in mind such as stainless steel fuel tanks, high windscreen for protection, Two Inch 'A' frame with tow point, integrally bonded consoles and seating.
