

Ribcraft 7.8 follows the rest of the Ribcraft Range in offering safe and dependable boating. She is designed as a commercial foul weather boat and has proven herself in this field. Even in inhospitable sea conditions worldwide the Ribcraft 7.8 will get you there with confidence. With a high sheer bow and a generous 2.7 metre beam they are true workhorses of the sea. The Ribcraft 7.8 can be customised to your individual specification whether military, commercial or rescue usage. The craft is capable of taking a wide range of power options which include outboard, stern drive or water jet.

The Construction

Ribcraft 7.8 has a cross linked inner matrix construction making her incredibly strong; the lay up is to commercial specification. The 7.8 is capable of extended long distance cruising, her fuel tanks are located under-deck, maximising the console space and lowering the centre of gravity thus improving trim and handling.

The Interior

Ribcraft 7.8 has a large open deck area which can accommodate many people or equipment. All control cables are routed below deck maintaining a totally clear working area. With many accessories; consoles, seating, propulsion and power options the boats can be totally customised to specific requirements whatever the application.
